Preface

Please check the document version of this publication:

• A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
• The final author version and the galley proof are versions of the publication after peer review.
• The final published version features the final layout of the paper including the volume, issue and page numbers.

Special Issue for the 42nd International Colloquium on Automata, Languages and Programming, ICALP 2015, Kyoto, Japan.
Preface

This special issue is devoted to selected papers from the 42nd International Colloquium on Automata, Languages and Programming (ICALP 2015), which took place from the 6th to the 10th of July 2015 in Kyoto, Japan.

ICALP is the main conference and annual meeting of the European Association for Theoretical Computer Science. It is one of the main conferences for the presentation of research on all aspects of theoretical computer science.

ICALP 2015 had three tracks. Track A was devoted to Algorithms, Complexity and Games and saw the presentation of 89 papers. The theme for Track B was Logic, Semantics, Automata and Theory of Programming; 34 papers were selected for this track. Track C focused on Foundations of Networked Computation: Models, Algorithms and Information Management and accepted 20 papers. This volume contains 17 selected papers: eight from Track A, six from Track B, and three from Track C.

The submissions for this special issue underwent a new and thorough reviewing and revision process, in accordance with the high standards of Information and Computation. We thank the authors for contributing to this special issue and the anonymous reviewers for all the hard work they put in reviewing the submitted papers. Last, but not least, we are grateful to Albert Meyer for agreeing to devote a special issue of Information and Computation to selected papers from ICALP 2015 and for giving us the opportunity to act as guest editors for it.

Magnús M. Halldórsson (Reykjavik), Naoki Kobayashi (Tokyo), and Bettina Speckmann (Eindhoven)
Guest Editors
