**Stability Limit of the Cryogenic Hydrogen Maser
[Phys. Rev. Lett. 64, 2630 (1990)]**

A. C. Maan, H. T. C. Stoof, B. J. Verhaar, and Paul Mandel

The results reported in this Letter require correction for thermal noise which is not completely negligible in the time-dependent domain due to the exponential smallness of the background signal between pulses. As a result the details of Fig. 3 will change, although the pulsed behavior continues to exist. The conclusions of the paper remain unchanged. A full treatment including thermal noise will be given in the paper announced in the last paragraph.
